

## Ingredient Information

### Each capsule contains:

- Calcium Microcrystalline Hydroxyapatite 500 mg

### In a Proteinaceous Matrix containing approximately:

- Calcium 125 mg
- Phosphorus 64 mg

### Other naturally occurring minerals including:

- (Magnesium, Zinc, Potassium, Silicon, Manganese, & Iron) 110 mg
- Protein (as Collagen, Glycosaminoglycans, and substituent amino acids) 121 mg
- Boron (Aspartate) 1 mg

# Calcerin®

## A Dietary Supplement

### Product Overview

The health consequences of osteoporosis and the benefits of calcium supplementation for women and men are widely discussed in the media today. What is not so widely discussed is that calcium by itself is not all that is necessary for bone health. Bone is a living tissue requiring calcium as well as a wide range of augmenting nutrients such as trace minerals and organic factors. Calcerin is a whole bone extract providing a highly bioavailable form of calcium as well as the intact organic “net” that is needed for calcium and other minerals to attach to. In addition, Calcerin supplies trace minerals naturally found in bone that are vital for bone nourishment.

### Healthy Highlights

- Calcerin contains Microcrystalline Calcium Hydroxyapatite (whole bone extract) providing elemental calcium as 25% of total weight.
- Special processing preserves the whole bone matrix so that all naturally occurring components remain intact.
- Boron, a trace element shown by research to be a contributing factor in bone mineralization, is a complementary addition to the formula.
- Each batch of raw materials used in the production of Calcerin are carefully analyzed and screened for any heavy metal contamination.

### As Part of Your Plan

Osteoporosis complications are the 12th leading cause of death in America. Because bone is constantly being dissolved and rebuilt, good nutrition is vital for supplying all the necessary nutrients for this re-modeling process. Calcerin provides the perfect natural source of calcium, trace minerals, and collagen protein.

### Recommended Usage

Recommended Adult Use: Two (2) to three (3) capsules per day, preferably at bedtime.
