

Ingredient Information

Each RCDR* Capsule Contains:

•Pancreatin USP500 mg

Supplying:

•Lipase 1,000 USP Units
•Amylase 12,500 USP Units
•Protease 12,500 USP Units
•Bromelain
(a proteolytic enzyme from pineapple) 150 m.c.u.
•Cellulase 3 W.C.A. Units
•L-Lysine Hydrochloride 50 mg
With Excipients

*RCDR = Proprietary base of Rapid Disintegrating Control Release.

Digestezyme™

Digestive Dietary Supplement

Product Overview

A quick moment of TV channel surfing is all that is needed to realize that digestive problems are rampant in America. Advertisements for heartburn, gas, and indigestion medications are part of our everyday life. Often, however, these symptoms can be related to reduced digestive enzyme activity in the gastrointestinal tract.

Digestezyme is a dietary digestive aid that is specially formulated to supply natural enzymes to aid in the efficient breakdown of dietary proteins, fats, and carbohydrates.

Healthy Highlights

- Digestezyme contains a balanced blend of lipases (fat-digesting enzymes), proteases (protein-digesting enzymes), and amylases (carbohydrate-digesting enzymes) and other synergistic compounds.
- Digestezyme contains only pure United States Pharmacopeia (USP) grade pancreatin.

As Part of Your Plan

Breaking down the foods you eat into simpler forms for good absorption is the first step in nourishing your body. The Digestezyme formula provides a broad-based blend of naturally occurring enzymes to help.

Recommended Usage

Recommended Adult Use: One capsule with each full meal.
